## Outreach Programme on Conjunctivitis

AZARA, August 29: In an effort to raise awareness about the recent increase in cases of conjunctivitis, commonly known as "pink eye," the students from second-year Diploma in Pharmacy from the School of Pharmaceutical Sciences at Girijananda Chowdhury University, Tezpur campus, conducted a vital outreach programme in Tezpur. The program was skillfully organized by Mr. Padmanath Pegu, Dr. Hemanga Hazarika, and Dr. Ravi Kumar Rajan, Assistant Professors of the School of Pharmaceutical Sciences, GCU, Tezpur, which took place at two important locations within the community: Udmari Lower Primary School, Udmari village, and Govt. Higher Secondary School, Dekargaon. The goal of the educational program was to educate students, teachers, and nearby villagers about the transmission, basic prevention strategies and the importance of eye care in daily life. It began with an introduction to the significance of eye health followed by an informative street play that demonstrated how conjunctivitis spreads and ways to prevent it. The students also distributed candies, pencils, and erasers to the children at Govt. Lower Primary School and engaged in meaningful interactions with students and teachers. This comprehensive program successfully concluded leaving a lasting impact on our community and emphasizing the importance of eye health.
